## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or render obvious a control mechanism for a planetary manual transmission having a multiple synchronizers each having a neutral position and at least one engaged position and a plurality of shift control rods adapted to move the synchronizers, where the control mechanism comprises: a plurality of slotted plate members, each having a distinct slot configuration for each individual shift control rod, a control pin aligned in each of said slot configurations in each slotted plate member, and means for manipulating said slotted plate members individually to enforce selective movement of said pins to thereby control at least two synchronizers into respective engaged positions, and means for preventing movement of more than one slotted plate member at a time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
